Leap Corporation

Dear Hiring Manager,

I am pleased to be applying for the Frontend Development Intern position at Leap Corporation. My production level experience with developing websites using React, HTML, CSS, and JavaScript ES6, as well as my experience with developing mobile applications using React Native matches well with your requirements. In addition, my background with working in an agile software development environment has given me the skills to adjust to changing dynamics while meeting scheduled goals and deliverables.

In my previous experience at Tasttlig Corporation, I developed several web-based applications for the company, Including the food festivals platform, which was used by the company's marketing teams, local business partners, and customers to host, manage, and avail products, for food festivals to promote local restaurants and businesses in neighbourhoods. I was involved in the design and development process for the application, and I contributed to enhancing the platform for every update since I joined the team.

Thank you for taking the time to review my credentials. I am very passionate about being a competent and contributing team player, and, as a self-taught developer, I am always looking for opportunities to learn about different technologies and grow as a developer. I look forward to answering your questions and learning more about this position and your development teams.

Sincerely,  
Andre Cura
